

[Are You In The Global Market or Is Your Competition Killing You](#)

What the heck is a Global Mentor? With the World getting smaller by day, a normal mentor will keep you from succeeding. You 95% of mentors out there are going to be teaching from 20 + years of experience. That is great except you need to know what works today. The only way to learn these business concepts is from someone making it happen each and every day. A Global Mentor will open the doors on how to build your business and compete globally and how to outsource your work to turn your 60 hour + work week into a 15 to 20 hour work week. No BS...Just fact.

No matter what your current situation is, we are all striving to reach Financial Freedom or striving to help others reach their Financial Freedom. You see Financial Freedom is a great thing. It allows you to help others like you never thought possible. It is not all about buying expensive cars, clothing, homes and more. It is about making a difference in others' lives. That is what life is all about. Helping others and paying back your good fortune.

Your Global Mentor's mission is to give you the best possible chance for success. They should be able to teach all aspects of their business (most can do this - but some are lame). They should be able to teach you how use the World Wide Web to take your business Global (few can effectively do this - most will say they can), they need to be able to show you how to effectively create your business ideas, develop your ideas, create a product or service, then maximize this new technology into money (less than .1% can do this) and then they need to provide a membership site that will host all aspects of training. This should include teleconferences, video training, Audio training, webinars and software product training (less than .01 % can do all of this). So choose your Global Mentor Wisely.

The internet is flooded by so called Millionaires, here are some quick question to find out if they know what they are doing? Frankly I could care less how much money they make but how much money they help others make. How many people do you currently support? What is the average monthly income of these people? Do you personally have a membership site with audio, video, webinars for training purposes? What is your success rate? Do they have strategic business partnerships aboard? How many countries do they currently do business in? What was the last great idea that your team implemented? This is a good list to start with and will knock out 95% of the lower tier Mentors.

Financial Freedom is not developed by competing for table scraps. Then why are 95% of the opportunities out there still teaching out dated technology. It is because the fat cats are still making money. 95% of the others are not but the fat cats. Do not fall into this trap. There are a few awesome opportunities out there. Grab one and Get it done.

You will need help in overcoming yourself and your surroundings. Let me explain....We are all conditioned by our environments as we are growing up. This is good and bad. As we are not taught that we really can achieve anything in our lives. At some point in time it just became too hard for most people to achieve that goal. So they revert back to the feeling that they must accept where they are in life. FALSE. Nothing could be more wrong. Your Global Mentor's job will be to assist you in building small wins together until you have reached a larger goal. As your belief begins to rise, so will your income, but you must overcome yourself and your doubts first. Additionally, there will be times that obstacles will present themselves and you will need to turn to your Global Mentor for assistance.

You are going to need to get out of your comfort zone and destroy that zone. What you have currently is due to your current comfort zone and skills. You will need to increase your skills and get rid of your comfort zone. This is where your Global Mentor is key. They will assist you in achieving these goals and put you on the track to Financial Freedom.

Have you ever thought that someone was lucky. Why do others get all the breaks? All my friends and relatives think that I have a golden parachute that gives me my wealth, but in reality I find that the better I use technology, the more focused I am towards my goals, the better I master mind with others and the smarter I work, the luckier I get. Luck does not play a role in anything in life....NOTHING...Being prepared for opportunities and taking those opportunities is what others would consider luck. Look, if you never go after an opportunity then how can you think you will ever reach Financial Freedom. Do you want to learn how be lucky, oh, I mean be prepared for the next opportunity that is in front of you.

Choosing to better you life is only a choice away. If you realize that you and only you can make the decision go for Financial Freedom, you have taken the right step. We all make choices in our lives. Some bring us wealth and others rob us of our chances for Financial Freedom. Take this challenge. Take 20 minutes and write down your favorite TV shows. List as many of them as you can.....Add the hours per day that you watch TV.....list your favorite internet sits that you go to each day....Add the hours you spend on the computer per day....Now add all the hours together and write that number down....and circle it... Ask yourself, "How much money did I make doing these tasks?". A better question is, "How much money did I lose by wasting those hours each day?". You are going to have to make sacrifices, some changes in behavior and some changes in your daily activities, but it will be worth it.

Your family is being help hostage by your JOB. You know that thing that company pays you just enough so you don't leave and you make the

company rich. Why is this, I do not understand this process. I used to think the Corporate lifestyle was fun. I was an Executive in Fortune 50 Company. A certified Big Wig.. You know what....the day I left Corporate America was the best day of my recent life. Stop making others rich.!
